

BEST IN PHONICS AND READING

ACQUIRING LANGUAGE SKILLS THE FUN WAY

With enjoyable teaching methods,
going to class doesn't have to be a chore at *Jan & Elly*.

Jan & Elly came about when founder Elly Sim realised that Singapore lacked the specific learning environment she was seeking for her daughter Sara, particularly when it came to phonics and writing. At the English language school, the priority is for children to be willing and happy learners. Thus, lessons and activities are built upon the foundation of helping the little ones to enjoy the learning process.

Jan & Elly's phonics curriculum focuses on teaching students the sound of each letter or phonetic blend, and uses them to break up various words. Using a systematic and easy-to-follow approach, the programme starts off with single-letter sounds, before progressing to vowel blends, consonant sounds and eventually the more challenging irregular blends. Due to the natural progression through the stages of the learning process, Jan & Elly helps children gain confidence along the way, allowing them to push their own limits. This enables them to have a firm grasp of the language while enjoying the classes.

Holding a Bachelor of Science in Child Development & Psychology from University of North Texas in the United States, Elly's background comes in handy when structuring classes. Using the latest child development and psychology methods in the industry, Jan & Elly constructs a lively and stimulating curriculum.

Gone are the usual language classes where students learn passively and are force-fed with overwhelming information. In place of that, children have a good time learning through fun, dance and song. Such an immersive environment is probably what we as parents wish we had for ourselves.
